Title Page (with author details)

Manuscript title. Dissecting LLM News Sentiment Scores: De-Identification, Batch Composition, Scoring Noise, and Price Echoes in Return Predictability

Author. Chang Tan

Affiliation. Dalian University of Technology

Corresponding author. Chang Tan, Dalian University of Technology. Email: aquars43@foxmail.com.

Acknowledgements. None. This research received no external funding.

Data and code availability. The companion paper (a 27-page main text plus a separate 18-page online appendix containing appendices A–K), the complete replication package (all LLM scores, per-call API logs, seeds, scripts, and analysis outputs), and the preregistered design documents are available at `https://github.com/43aquarius/dissecting-llm-news-sentiment-scores` (Release v6.5.0). In accordance with double-anonymized review, this repository link appears on the title page only; the anonymized manuscript contains no author-identifying information, and the anonymized online appendix accompanies it as supplementary material.
